Active Secret Security Clearance

SUMMARY

Computer Science student at Southern New Hampshire University (3.9 GPA, expected Feb 2027) who recently completed four years of active duty as a U.S. Air Force Medical Logistics Technician. I build software across Java, Python, JavaScript, and C++, from a hardened Spring Boot backend to a CPU-level Game Boy emulator built from primary documentation. Before my military service, I independently ran IT operations for a small business, everything from network infrastructure to security to vendor coordination, which gave me a practical, ownership-first approach to technology that I've carried through my degree and my career since. I pick up new languages and systems quickly, and I'm looking for a software engineering role where that combination of hands-on IT depth and software development is useful from day one.

EDUCATION

Southern New Hampshire University

Expected Feb 2027

Bachelor of Science, Computer Science | GPA: 3.9

President's List (3x) and Honor Roll (8x), 2025–2026

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C++, SQL

Web & Backend: REST APIs, Spring Boot, HTTPS/TLS, SHA-256 Checksums, OWASP Dependency-Check

Core CS: Data Structures & Algorithms, Object-Oriented Design

IT Operations: Network Administration, Endpoint Security, User Account & Access Management, Data Backup & Recovery, Vendor Coordination

Practices: Agile/Scrum, Git/GitHub, CI/CD, JUnit, PyTest, SDLC

Other: Technical Documentation, Cross-Functional Communication, Data Analysis (Excel)

PROFESSIONAL EXPERIENCE

United States Air Force | Medical Logistics Technician

Aug 2021 – Aug 2026

Lackland Air Force Base, TX

- Own \$25M+ in emergency medical equipment and \$200K+ in acquisitions end to end, from procurement through inventory reconciliation, with full accountability for accuracy under quality assurance review.
- Collaborate daily with technical and non-technical team members, preparing executive reports and readiness briefings that translate operational detail into clear, actionable recommendations for leadership.

iZen AI Inc. | Boots2Bytes Cybersecurity Trainee

2026 – Present

Remote

- Complete hands-on labs in threat identification, risk analysis, and incident response as part of a defensive-security training curriculum.

MarumSCO Cleaners | IT Technician

2016 – 2020

Woodbridge, VA

- Served as the primary IT point of contact for the business, independently managing day-to-day operations across workstations, POS systems, printers, and network/Wi-Fi infrastructure, and coordinating with ISPs and software vendors when escalation was needed.
- Administered user accounts and access permissions and strengthened security through endpoint protection, regular OS/software updates, and secure configurations.
- Managed data backup and recovery procedures to protect customer records and maintain business continuity.
- Led technology upgrades end to end, from evaluating needs and recommending equipment/software within budget through installation, configuration, and employee training.
- Diagnosed and resolved hardware, software, and connectivity issues, addressing root causes to reduce recurring problems, and documented support procedures to standardize maintenance and onboarding.

PROJECTS

Game Boy Emulator | Independent Project (Python)

- Built a Game Boy emulator from scratch with zero prior knowledge of the hardware spec, implementing the SM83 CPU instruction set, memory bus, PPU, and cartridge/MBC support from primary documentation.
- Verified correctness with a pytest suite covering the full instruction set, including CB-prefixed opcodes and interrupt handling.

Artemis Financial | Secure Software Engineering (Java, Spring Boot)

- Hardened a Java Spring Boot application with HTTPS/TLS and SHA-256 checksum verification, and remediated dependency vulnerabilities using OWASP Dependency-Check.

CERTIFICATIONS

- CompTIA Security+ | Basic Life Support (BLS)
